The Golden Rule of Prompting

Give the AI a **ROLE**, a **TASK**, **CONTEXT**, and a **FORMAT**.

Example: "You are an Excel expert (role). Write a formula (task) for this data layout: ... (context). Explain it step by step (format)."

Excel & Spreadsheets

1. You are an Excel expert. My sheet has [column A: dates, column B: product names, column C: sales amounts]. Write a formula that [sums sales for each month]. Explain how it works.
2. Explain the difference between VLOOKUP, XLOOKUP and INDEX-MATCH with a simple example of each. When should I use which?
3. This formula returns an error: [paste formula]. My data looks like: [describe]. What's wrong and how do I fix it?
4. Design a spreadsheet layout to track [monthly personal budget] with categories, planned vs actual, and a summary dashboard. List the columns, formulas and one chart to include.
5. Write a formula to clean this data: [describe mess]. Then show the same fix using Power Query steps.
6. Create sample data (20 rows) I can paste into Excel to practice pivot tables, then give me 5 pivot table exercises with answers.
7. I have [two sheets: orders and customers, linked by customer ID]. Write the formula to pull each customer's city into the orders sheet.
8. Turn this repetitive task into a step-by-step Excel macro: [describe task]. Give me the VBA code with comments explaining each line.

Studying & Exam Prep

1. Explain [photosynthesis] in three levels: to a 10-year-old, to a high school student, and to a university student. I'll tell you which level matched my understanding.
2. Here are my lecture notes: [paste]. Create a one-page summary with the 10 most exam-relevant points, then 5 likely exam questions with model answers.
3. Quiz me on [topic]. Ask one question at a time, wait for my answer, tell me if I'm right, and get harder as I improve. Track my score.
4. I have [14 days] before an exam on [subjects]. I can study [2 hours/day]. Build me a day-by-day revision plan with spaced repetition.
5. I'll explain [concept] in my own words. Point out every mistake or gap, then give me a corrected version: [your explanation].
6. Create 15 flashcards (question / answer) from this text: [paste]. Focus on definitions, dates and cause-effect relationships.
7. Compare and contrast [concept A] and [concept B] in a table: definition, when it applies, strengths, weaknesses, one example each.
8. I got this exam question wrong: [question + your answer]. Explain the correct approach step by step, then give me 3 similar practice questions.

Essays & Writing

1. I'm writing an essay on [topic]. Suggest 3 possible thesis statements with a one-line argument outline for each. Ask me questions first if the topic is too broad.
2. Critique this draft like a strict professor: [paste]. Focus on argument logic and structure, not grammar. List the 3 weakest points and how to fix them.
3. Rewrite this paragraph to be clearer and 30% shorter without losing meaning: [paste].
4. Here's my outline: [paste]. What counterarguments am I ignoring? Give the strongest objection to my thesis and how I could address it.
5. Check this text for flow: point out every sentence where a reader might get confused, and explain why: [paste].

Business & Email

1. Write a professional email to [a client] about [a project delay]. Tone: apologetic but confident. Include a new timeline. Under 150 words.
2. Turn these rough meeting notes into structured minutes with decisions, action items (with owners) and open questions: [paste].
3. I run a [small business type]. Give me 10 concrete ideas to increase revenue in the next 60 days, ranked by effort vs impact.
4. Draft a one-page business plan for [idea]: problem, solution, target customer, revenue model, 3 biggest risks, first 5 steps to launch.
5. Summarize this report for my manager in 5 bullet points with one recommended decision: [paste].
6. Act as a tough negotiator on the other side of this deal: [describe]. I'll make my offer, you respond realistically, then tell me what I could've said better.
7. Write a polite follow-up to an unanswered email. Version 1: after 3 days. Version 2: after 2 weeks (final). Context: [paste original email].

Marketing & Social Media

1. Generate 10 blog post titles about [topic] optimized for search. Mix how-to, listicle and comparison formats, then mark the 3 with best click-through potential.
2. Write 5 Instagram captions for [product/post], each with a different hook: question, bold claim, statistic, story, humor. Include hashtag suggestions.
3. Create a 30-day content calendar for a [niche] page: post idea, format, and goal (reach/engagement/sales) for each day.
4. Rewrite this product description to focus on benefits instead of features, for an audience of [students]: [paste].
5. Analyze this landing page copy and list what's stopping visitors from converting, in priority order: [paste].

Learning English

1. Let's have a conversation about [daily life topic]. Correct my mistakes in brackets after each of my messages, but keep the conversation flowing.
2. Give me 10 sentences with common B1-level grammar mistakes. I'll correct them; then grade me and explain the rules I struggled with.
3. Teach me 8 phrasal verbs used in [job interviews], each with an example dialogue line and a mini-exercise.
4. I'll write a paragraph in English. Rewrite it three ways: casual, professional, academic - and highlight what changed: [paste].
5. Simulate a job interview for [position] in English. Ask one question at a time. After each answer, give feedback on content and language.

3 Habits That 10x Any Prompt

1. Add examples - "Here's one I like: [example]. Match this style" improves output instantly.
2. Iterate - the first answer is a draft. Say "shorter", "more formal", "give me 3 alternatives."
3. Ask it to ask you - ending with "ask me anything you need to know first" prevents generic answers.
